swelling and pain!*

# TEST

To know if the VeinOPlus is right for you, answer the following questions and check the results!

- Suffer from swollen legs.
- Have cold feet due to poor circulation.
- Have leg pain when walking.
- Suffer from aching legs.
- Have hard to heal foot or leg ulcers.
- Have unsightly or varicose veins on legs.
- Regularly sit or stand all day long while at work.

## Results & Recommendations

➡ **0 checked boxes:** You do not seem to be suffering from venous insufficiency and/or peripheral arterial disease. Certainly, if your conditions change, then it is recommended that you consult with your doctor about the need for daily VeinOPlus therapy.

➡ **1 or more checked boxes:** Indicates you have symptoms of venous insufficiency and/or peripheral arterial disease. To reduce swelling, leg pain, and improve your quality of life, we recommend you use VeinOPlus Vascular on a daily basis to treat your condition.

**Next Step: Talk to your doctor about daily VeinOPlus therapy to help with your vascular condition.**
