Bio Compression’s Sequential Circulator – SC-3008-DL

CAPABILITY STATEMENT

VasoCARE is proud to provide Bio Compression’s Sequential Circulator System to veterans suffering with lymphedema, chronic edema, and venous stasis ulcers throughout the USA.

The SC-3008-DL, a digital 8-chamber pneumatic device provides calibrated gradient sequential compression for treating lymphedema, lymphedema associated with venous insufficiency, and/or venous stasis ulcers.

The ultimate pneumatic compression device delivers gradient pressure to every chamber to maximize lymphatic drainage.

A wide variety of limb sleeves are compatible with the SC-3008-DL to treat legs, groin, buttock, abdomen, arms, and chest areas.

Program pressure settings in all 8 chambers, maintains greater distal pressure to prevent reflux. Compliance meter monitors use and adjustable countdown clock shuts off the pump after treatment has ended.

KEY FEATURES:

- 8 chamber system
- Sequential, non-peristaltic
- Gradient pressure
- Distal to proximal cycle
- 60 second cycle time
- 0 - 120 mmHg pressure range
- Compliance meter and timer
- Custom arm and leg sleeves
- Bio Compression Systems is a USA company

CORE DATA:

NAICS: 339113, 621999
Surgical Appliances

SPECIFICATIONS:

- Size: 4.5” x 11.75” x 7.75”
- Weighs: 5.9 lb.

COMPANY SNAPSHOT

CAGE Code: 75U54
DUNS Number: 038082014
FSS Contract#: 36F79719D0099
Point of Contact: John Berges
Email: john@vasocare.com
Phone: 800-256-9979
Fax: 866-455-5150
Address: 6554 Florida Blvd.
Suite 123
Baton Rouge, LA 70806
Accreditation: HQAA
Networks: Medicare, Medicaid, BCBS, Humana, UHC, etc.

Maximum Comfort for Positive Results

The SC-3008-DL Sequential Circulator is as unique as the patient population it services.
Sequential Circulator SC-3008-DL

Patients have different needs so our advanced digital compression device measures and delivers calibrated gradient pressure to each of the 8 chambers in the limb sleeve to provide the best possible treatment. The SC-3008-DL lets the user program the pressure setting in each of the 8-chambers, always keeping greater distal pressure to prevent reflux. Compliance meter monitors patient-use and count-down clock automatically shuts off at the end of the session.
