

VeinOPlus® is the first dedicated device with Second Heart™ Technology to treat and manage calf muscle pump dysfunction!

VasoCARE^{LLC}

CAPABILITY STATEMENT

VasoCARE is the exclusive distributor of the VeinOPlus® Vascular device for treating chronic venous disease (edema and venous leg ulcers) and peripheral arterial disease (claudication limb pain and diabetic foot ulcers) conditions. VasoCARE, LLC is in network with Medicare.

VeinOPlus Vascular, a neuromuscular electrical stimulator, using Second Heart™ Technology to increase venous outflow and arterial inflow.

The device weighs 24 grams and is powered by a 9-volt battery.

VeinOPlus, a Class II device, treats calf muscle pump dysfunction resulting from disuse muscle atrophy.

VeinOPlus is perfect for treating CVD and PAD patients. Delivers 60 impulses every minute or 3,600 during one hour of therapy.

VeinOPlus improves ...

- venous outflow 7x
- arterial inflow 4x
- foot temp 4°
- ABI 5% or more
- TcPO₂ levels 20%
- walking distance 100% w/o pain
- accelerates healing of foot or leg ulcers

VeinOPlus® Vascular Device

VasoCARE, LLC is exclusive distributor of VeinOPlus for the USA

The VeinOPlus Vascular device is an in-home therapy device designed to treat calf muscle pump dysfunction due to disuse muscle atrophy. The VeinOPlus increases venous outflow 7 times and arterial inflow 4 times. As a result, edema is reduced 94%, foot temperature is improved 4°, leg pain is reduced 85%, walking distance without pain is increased 100%, and ulcer healing is accelerated three times. VeinOPlus treats and improves edema, swelling with discoloration due to post thrombotic syndrome (PTS), intermittent claudication limb pain, hard to heal foot and leg ulcers, and night cramps due to chronic venous insufficiency.

OPEN MARKET ITEM				
Product	HCPC #	Description	Qty.	Price
VeinOPlus	E0745	VeinOPlus Vascular	1	\$950.00
VOP Electrodes	A4595	VOP Electrode Pads	24 (2-year supply)
